Village Development Proposal

Submitted

to

Chief Development Officer, Pauri Garhwal, Uttarakhand

by,

December, 2019 Unnat Bharat Abhiyan (UBA) Cell HNB Garhwal University (A Central University) Srinagar Garhwal, Uttarakhand

Village Development Proposal submitted to CDO, Pauri Garhwal

Under Unnat Bharat Abhiyaan By

H.N.B. Garhwal University, Srinagar, Garhwal

The HNB Garhwal University has adopted the following Gram Panchayats in consultation with the district administration Pauri Garhwal under the UBA.

Adopted Gram Panchayats (04): Koti, Kathud, Pokhri (Ka) and Doab (District Pauri Garhwal)

Adopted Villages under these Gram Panchayats (12)

Koti- Koti, Durgakot, Panaloyun urf Naisu, Kameda, Saindul (Total- 5 villages)

Kathud - Kathud and Saraikhet (Total- 2 villages)

Pokhri (ka) – Pokhri (Ka) (Total- 1 village)

Doab- Doab, Kaldung, Gadwagad and Radhaballabh Puram (Total- 4 villages)

Note: Koti, Kathud and Pokhri (ka) are GP's under Khirsu Development Block while Doab G.P is under Pauri block

The most prominent problem that has emerged in the survey conducted by the UBA and as revealed by the villagers of the adopted villages is the lack of Puccha road which enhances their problems to very extreme mainly during the rainy seasons. Further these Kuccha roads are in such a poor state that public road transport facility is not possible for the villagers of these villages. Keeping these issues in considerations the UBA cell proposes the following road map for the resolving this major problem of the villagers.

• To improve the condition of the Kuccha road

As per the problems revealed by the villagers the UBA cell proposes the development of the following existing *Kuccha* roads in the adopted villages:

- 1. Kuccha road from Jamnakhal to Kathud should be metalled. (Distance apprx. 2 km)
- 2. Kuccha road from Jamnakhal to Pokhari should be metalled. (Distance appx. 3 km)

• To develop new road to connect the surrounding villages with each other and from the headquarters

The UBA cell of HNB Garhwal University further proposes the construction of the following road to ease the transport facility and accessibility of the villagers to the basic facilities and amenities not available in these regions:

- A new road connecting Kathud village and Kameda village is proposed to link a cluster of villages with transport facility. (About 3 kms)
 The proposed road is along the agriculture land of the villagers for which they have given the first hand approval.
- 2. A new road between Kathud village and Kathuri village should be constructed to connect the Kathud, Pohari, Jamnakhal, Kaldhung, Doab with Khirsu village which is also a development block.

The following map is enclosed to indicate the demand of the villagers for the development of better road connectivity for the villagers.

Map of the adopted villages:

Road development Plan- Proposed network

UBA suggests to develop a road network between Jamnakhal—Kathud—Kameda—Koti. The development of road network between them is extremely important for their cohesive development and improving the flow of public transport facility to these villages. The UBA plan further proposes to develop a new road between Kathud—Kathur (Khirsu) so that Kathud and Pokhari and other nearby villages could be easily connected with the development block, Khirsu.

Facilitation of Public Solar street lights

Keeping in perspective the fear of wild animals in the villages and the poor condition of the roads within the village the UBA cell recommends:

• Increase in number of solar lights in Koti and Kaldhung villages

Protection of agricultural crops from wild animals (Monkeys and Wild boars)

• UBA cell requests to direct the concerned officials to take necessary actions mainly in the Pokhari and Kathud villages to control the population and encroachment of wild animals in the agricultural land.

Dr. Prashant Kandari
