## **Introduction :**

In 21<sup>st</sup> century, the global media has evolved as a key component to influence all aspects of the socio-economic and political behavior of human beings. Information society especially after the emergence of the digital age has made media education an important field of inquiry and has received scholarly attention as well. The goal of the five-year Integrated Programme in Journalism and Mass Communication is to familiarize students with all elements of the field of communication. The learners would get a better understanding of the subject's theories and practices in general. The curriculum will prepare students to be "ready to be hired by employers in the field of journalism and mass communication."

**Programme Objectives:** The objectives of the four-year integrated Programme in Journalism and Mass Communication is: -

- To equip students with contemporary media skills
- To enhance the journalistic skills through practical work, assignments project reports, seminars, and workshops.
- To offer appropriate grounding on the issues, ideas, and challenges of the 21st century, thereby broadening the worldview of future communication practitioners.
- To Inculcate scientific temper and critical thinking aptitude among students.
- To teach students how to conduct communication research.
- To motivate the students to become successful communication professionals.
- To develop the multi-tasking skills required in the dynamic multi-media and convergent environment.

**Learning Outcome:** On the completion of the Programme .

- The students will be able to learn the competency and skills required by the media industry.
- The students will be able to produce content independently for the media.
- The students will be able to create digital content as part of multimedia communication.
- The students will be equipped with soft skills required for many of managerial and high-profile jobs.
- The students will be able to develop scripts, films, video and radio Programmes, books, slide sets etc.
- The student will be able to facilitate dialogue and eventually empower people by using the information in a practical and useful way.
- The students will be well-equipped to be media educators and researchers.

## **Need for Curriculum Development**

The NEP 2020 Programme aims to develop a curriculum that will bring uniformity to students studying at various universities and institutes. The necessity for media education curriculum improvement arises for the following reasons: -

**The Changing Media Environment:** Multimedia, Photojournalism, Short Film Making, creating Blogs and Vlogs, Mobile Journalism, Writing for Media, Producing News Bulletins for Radio and TV, Advertising, and Corporate Communications are just a few of the areas covered in the curriculum. The media industry's rapid growth necessitates the use of highly skilled human resources.

**Transfer of Credit:** The UGC and the government have allowed credit transfer, which permits students to transfer courses from their current university to a new UGC-accredited university.

**Skill Enhancement:** The new curriculum emphasizes hands-on training and internships, allowing students to improve their abilities. Its goal is to produce not only responsible communication professionals but also people who are compassionate in their daily lives. Papers such as Writing for the Media, Photojournalism, and Computer Applications for the Media, among others, aid in the development of students' skills.

**Career Options:** In recent times, the scope of Journalism and Mass Communication as a field has increased tremendously and there is no dearth of job opportunities. After the completion of the Programme, students can opt for the following career options: -

- Journalist
- News Anchor
- Digital Marketing Experts
- Radio Jockey
- Content Creator/Developer
- Graphics/web Designer
- Social Media Executive
- Public Relation Professionals
- Publicity/Advertising Expert
- Event Manager
- Professional Photographer
- Film/Television production Professional

## **Pedagogy**

Journalism pedagogy is developed with the goal of imparting knowledge and skills and preparing professional skilled media and communication experts. It gives a wide variety of finely framed syllabi exposure.

**Importance to Theories and Practices and their Application:** The Journalism curriculum emphasizes cutting-edge theories and practices, preparing students to be full-fledged media

professionals. To ensure a successful teaching process, students should be organized into batches of not more than ten students each under the supervision of a teacher.

**Utilization of ICT:** The global media sector is looking for ICT-trained communication specialists. ICT tools are blended into teaching approaches such as research-led teaching, presentations through smart classrooms, and practical productions to increase critical and creative thinking among students.

**Research-based and Research-led Teaching:** Research Projects are included in the curriculum to help young researchers for a better understanding of research principles. According to the relevance of the profession, students are introduced to various aspects of communication research such as print, electronic, digital media, global, health, political communication, folk media, intercultural communication, and other development issues. Under the supervision of a research guide, students will do a research project/Dissertation on a topic of their own choice.

**Critical Thinking:** Group and individual conversations will be held with the students. This will assist students in developing and enhancing their critical and analytical thinking. It also aids their decision-making and crisis management capability, boosting their self-confidence as well.

**Methods of Instruction:** Typical methods of instruction may include: -

- Lecture
- Activity
- Discussion
- Interaction with experts
- Community Participation

**Methods of Evaluation:**

- Exams/Tests
- Class Participation
- Class Performance
- Lab Work
- Assignment
- Group Project
- Portfolios
- Research Projects

<b>Course Objectives:</b>	
<ul style="list-style-type: none"> <li>• To learn the science of statistics and its potential application</li> <li>• To know data compilation and presentation.</li> <li>• To identify appropriate statistical analysis for the research problem.</li> </ul>	
<b>Course Description</b>	
This lab-based course will teach students how to use SPSS software for data compilation, analysis, and presentation. Students will be demonstrated different SPSS and Microsoft Excel software techniques. Students will gather statistical data and practice making codes, data entry, and data analysis using SPSS.	

**Learning Outcomes:** After the completion of the course, students will be able to;

- Appreciate the science of statistics and the scope of its potential applications

- Summarize and present data in meaningful ways
- Select the appropriate statistical analysis depending on the research question at hand
- Form testable hypotheses that can be evaluated using common statistical analyses
- Understand and verify the underlying assumptions of a particular analysis
- Effectively and clearly communicate results from analyses performed to others
- Conduct, present, and interpret common statistical analyses using SPSS and Microsoft Excel
