Concept Notes

Research methodological training is required to carry out scientific and systematic investigations of an undertaken problem in light of science and art. On the other hand, philosophical basis of social sciences research develops in different subjects is becoming complex and hastily evolving day by day. And, therefore theoretical framework and techniques of social sciences research are becoming more multi-disciplinary from research point of view. At this juncture, understanding and training of methodological views point becomes essentially challenging to young researchers, academicians, policy makers and academic think-tank. Moreover, from the stage of research problem to the ultimate reporting and publication of the findings, there are several aspects in which a good researcher has to refine and hones their skills time to time. To attain a competitive edge and cognitive status, social science research needs to focus on linking classroom teaching with R&D in today's globalized world. Therefore, the ICSSR funds and sponsors Research Methodology Programmes in Universities and Research Institutes. This research methodology course is designed to support the scholars of professional education to produce quality of research work and playing a more regular and effective role in policymaking. It also pays special attention to skills the gaps on data analysis and publication ethics.
